COMPACT K 420 models not only comply with the EU Ecodesign labelling regulation, but ranking in energy efficiency class B makes these refrigerators the most energy efficient compact models in the marketplace.

Correct and uniform temperature throughout the cabinet is critically important for a food storage cabinet. GRAM COMPACT provides this with a unique ventilated air distribution system and a robust refrigeration system with sufficient refrigeration capacity.

COMPACT is approved to endure up to 30°C ambient temperature (climate class 4). It further offers low heat emission with minimal compressor running time.

With a footprint of 59.5cm (W) x 64.2cm (D) x 187.5-190.5cm (H), these small space storage cabinets are easy to fit in especially when space is of a premium.
